

HQ Mini Dryer

Features & Benefits

- Compact design
- Remove moisture before it enters your airlines and causes damage
- Can be hardwired into pressure switch or supplied with 10AMP plug
- Upon request can be special built on compressor (see below)
- Can be retro fitted to your current compressor
- Suits most single phase air compressors
- Air cooled means that you won't ever have to re-gas it

KEEP IN MIND

When selecting a dryer keep in mind that you require Pre & Post filters to eliminate any contamination (dust & oil particles) refer to [page 5 - 8](#) for these filters. All dryers to be fitted with inline Pre & Post, and any piston fit-out an oil separator is also required.

Product Description

Eliminate any water carry over into your tank or airlines with our specially designed HQ Mini Dryer. This unit comes with a handy 10 AMP plug or can be hard wired straight into your compressor pressure switch.

Compact in design it is perfect for applications where a larger dryer isn't needed.

This unit can be fitted during the build process of the compressor if you are after an all in one system. Alternatively it can also be retro fitted at a later date.
