

# Single Phase

## Full Industrial

Trade Series by Peerless boasts an extensive range of Single Phase Air Compressors to suit a variety of applications, or constraints that may be in place. With free air deliveries ranging from 240LPM – 650LPM. All Trade Series branded air compressors are designed to suit full industrial use. Our huge pump warranties and after market support system are a clear stand out when compared to others.

The PU13V is a 10AMP compressor and still designed for full industrial use. This unit features the highest level componentry and is backed with a 5 year pump warranty. In 15AMP we offer the PU17W & PU15HP. The PU17W is ideal when customers are needing high volume of air while the PU15HP is designed for high pressure of air.

The PU15HP features a two stage design making it possible to maintain its air flow volume at a higher pressure (150 - 175 PSI). All the pumps on Peerless belt drive single phase compressors come with a huge 5 year pump warranty giving you a great piece of mind when investing your money.

### PU13V Single Phase - 10AMP

#### Product Description

The PU13V boasts an impressive compact design giving 240LPM of free air delivery on a 48L air receiver. Dual air outlets on this machine means an easy transition between direct tank pressure and a regulated outlet with a water trap (with auto drain) for use of air tools.

A powerful genuine 2.5HP motor runs the 2060V pump at super low revs keeping the noise down and also the temperature of the pump. Fitted with a domestic 10AMP power lead this full industrial machine packs a mighty punch.

### PU17W Single Phase - 15AMP

#### Product Description

The PU17W single phase air compressor is one of the biggest machines on a 15AMP plug producing 320 litres per minute of free air delivery.

Cast iron crankcase, stainless steel valves and a slow revving pump also makes this one of the quietest on the market. Our competitors are too scared to mention their pump RPM!

With a Smart Start filter supplied, this will help reduce the AMP draw on start up by letting the motor get up to RPM before sucking air through the inlet and helps reduce the load on the motor.

Comes with 2 outlets, one out from the water trap regulator and one directly out from the tank for full tank pressure. Built to last with solid puncture proof wheels. Having one of the largest warranties on the market, 5 Year Pump and 1 Year Motor Warranty this puts your mind at rest when investing in a quality product.

Due to its popularity the PU17W also comes in a fatboy model and also a vertical design, both featuring 110l tanks. When portability isn't required both these option are perfect with an increased compressed air storage.

### PU15HP Fat Boy - 15AMP

#### Product Description

The PU15 is a 3.5HP two stage, high pressure compressor capable of running up to 175PSI. Two stage means that the pump has two low pressure heads which then feed into the high pressure head. These machines are fantastic for tyre inflation i.e. truck tyres or applications where large volumes of air at high pressure is required. The advantages of a two stage compressor are that you do not lose volume of air at higher

pressure. The air temperature is some 40% cooler than the standard type of air compressor therefore producing less condensation (moisture).

As a result this is a great compressor for the agricultural sector where there is a requirement to efficiently pump up truck tyres every so often.

PUMP UP TIME TO 100PSI:  
**1.20 - 1.25 MIN**

**880MM X 400MM X 670MM**

**WARRANTY**  
5 YEAR PUMP / 1 YEAR MOTOR

PUMP UP TIME TO 100PSI:  
**1.10 - 1.15 MIN**

**1060MM X 450MM X 750MM**

**WARRANTY**  
5 YEAR PUMP / 1 YEAR MOTOR

PUMP UP TIME TO 100PSI:  
**2.30 - 2.35 MIN**

**1090MM X 450MM X 890MM**

**WARRANTY**  
5 YEAR PUMP / 1 YEAR MOTOR
